

HP 3000 Series 58 Business Computer System

Compatibility with the past.
Innovation for the future.

**Series 58:
Improved performance.
Greater productivity.
An HP system that fits in,
right where you need it.**

Your company's computer needs are already substantial, and growing. To keep pace with that growth requires a powerful system, with innovation built in as standard equipment.

Introducing the Hewlett-Packard Series 58 computer system. It's the powerful new mid-range performer in the HP 3000 family.

With the Series 58, you gain access to all the recognized strengths of the HP 3000—a broad family of compatible, easy-to-use systems. But you also get something more: proven performance, extensive data communications capabilities, and exactly the level of power that a lot of companies demand right now.

When we introduced the HP 3000 family of business computers, we made a couple of essential strategic decisions:

- **A long-term commitment to solving our customer's business computer needs.** With the HP 3000 family, we offer complete solutions that cover a broad range of price and performance. Through this single family, we can cost-effectively meet the computer requirements of most businesses. The Series 58 extends our commitment even further, by providing the latest in performance technology in the mid-range of the family.
- **One operating system for the entire HP 3000 family.** From the compact Series 37 all the way to the top-performing Series 68, every HP 3000 uses the same operating system. So you can grow to a bigger system—or expand with

several smaller ones—without re-writing your software or replacing your peripherals.

It's reasons like these that have made the HP 3000 one of the most popular business systems today, with an installed base of more than 20,000 computers.

It's why Hewlett-Packard—for four years in a row—has ranked first in customer satisfaction in the Datapro survey published in *Computerworld*.

And it's why hundreds of hardware and software developers have committed their companies to our computers, creating solutions that allow the HP 3000 to work over a wide range of applications.

The Series 58: Extending a great tradition.

The Series 58 continues in the same dependable tradition of all HP 3000 systems. You can use it for all sorts

Series 37

Series 42

of commercial applications, from on-line transaction processing and batch processing of data to office-based word processing and communications.

The Series 58 offers excellent performance at a competitive price. You can configure it to meet your specific needs; taking memory up to 8 megabytes, disc storage up to 4.2 gigabytes; and connecting up to 152 terminals (including data-entry terminals, graphics terminals, and personal computers).

In addition, you get total compatibility with other HP 3000 systems, as well as with a wide selection of Hewlett-Packard printers, discs, tape drives, and other peripherals.

The Series 58 is designed to complement the other systems in the HP 3000 line, a family that includes:

Series 68, the powerful distributed mainframe that concurrently per-

forms on-line transaction processing, batch processing, data communications, and more;

Series 58, designed to handle a wide variety of similar tasks for medium- to large-size companies;

Series 42, providing cost-effective performance at smaller installations that don't require the enhanced connectivity of the Series 58;

Series 37, the ideal system for branch offices, departments, and small businesses.

By taking advantage of Hewlett-Packard's highly rated communications and networking tools, you can link any of these systems directly with other HP 3000s (as well as with systems from other vendors) in many locations—even worldwide.

So people all over your company, all around the world, can share electronic mail, while also taking advantage of our other sophisticated office tools.

Hewlett-Packard: A commitment to excellence.

Best of all, the Series 58 is made by Hewlett-Packard. Which is saying a lot. You can count on us to stand behind every one of our products, because of our reputation for technical innovation, financial soundness, and commitment to continuing excellence.

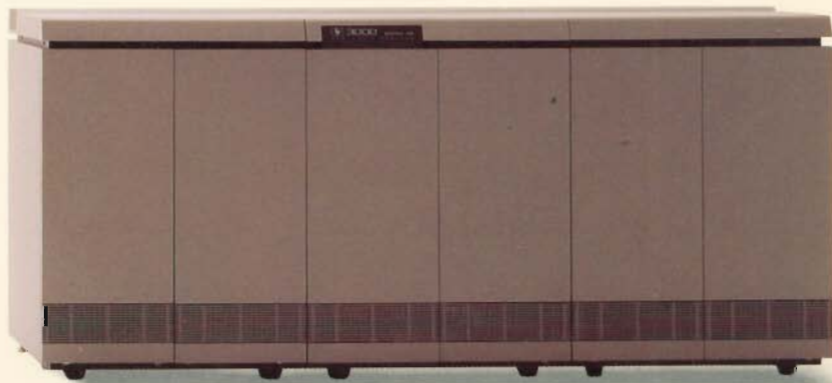

We wouldn't have it any other way. Because we know you expect that kind of support from us.

If you'd like to find out more about the Series 58 or the HP 3000 family, contact any HP sales office or your local value-added reseller.

Or just ask anyone who's already using an HP 3000 computer system. The chances are excellent that they'll tell you the same things about our products and customer support that we will.
