**IBM System/360 Operating System:
Release 21.8 Guide**

PREFACE

This publication explains the contents and status of Release 21.8 of the IBM System/360 Operating System.

Release Guides give installation managers, system programmers, and IBM personnel useful information on planning for and installing the current release.

This publication has four parts:

1. A functional summary of the items incorporated into this release.
2. A description of the maintenance activity included in this release -- APAR and PTF listings.
3. A module directory and a module status listing for the modules contained in this release.
4. Ordering information -- program material lists, hardware change levels, and documentation.

To have a history of all APARs, PTFs, and changes to the system libraries, save your Release Guides.

Seventh Edition (September, 1974)

This edition has been completely rewritten for Release 21.8 of IBM System/360 Operating System. Changes are periodically made to the information herein; before using this publication in connection with the operation of IBM systems, consult the latest IBM System/360 and System/370 Bibliography, GA22-6822, for the editions that are applicable and current.

Requests for copies of IBM publications should be made to your IBM representative or to the IBM branch office serving your locality.

A form for readers' comments is provided at the back of this publication. If the form has been removed, comments may be addressed to IBM Corporation, Publications Development, Department D58, Building 706-2, PO Box 390, Poughkeepsie, N.Y. 12602. Comments become the property of IBM.

Memorandum to: Users of Operating System/360

Subject: Distribution of Release 21.8

Release 21.8 may now be ordered for shipment beginning the week of September 27, 1974.

Content: It contains over 2000 APAR fixes, permanently resolves over 200 PTFs, and includes the following Component Releases:

Power Warning Feature (PWF) Support
System Modification Program (SMP)
Telecommunications Access Method 5E
3803 and 3420 Magnetic Tape Subsystem Support

Component Releases: No Component Releases are planned for installation on Release 21.8.

Ordering Instructions: The ordering instructions are unchanged from those of Release 21.7; see Part 4, Section 1.

Distribution Media: The following volume requirements differ from Release 21.7 to Release 21.8: 2314 magnetic-tape orders and 2311 disk-pack orders may need one additional volume. Other volume requirements are unchanged; see Part 4, Section 2.

Symbolic Libraries: Optional symbolic libraries are available on magnetic tape from PID. Order them from your IBM Marketing Representative.

Future Releases: Further update releases of the S/360 Operating System are not planned.

System Generation: Before generating your system, discuss the latest known restrictions, PTFs, and ECs with your local IBM Representative. See Part 1, Section 2.

CONTENTS

PART 1: FUNCTIONAL SUMMARY	1-1
Section 1: Release 21.8 Items	1-3
Section 2: Planning for System Generation	1-7
Section 3: Programming Considerations	1-9
PART 2: MAINTENANCE ACTIVITY	2-1
Section 1: APAR Lists	2-3
Section 2: Program Temporary Fixes Resolved	2-9
PART 3: MODULE SUMMARY	3-1
Section 1: Module Directory	3-3
Section 2: Module Status	3-23
PART 4: ORDERING AND DISTRIBUTION	4-1
Section 1: Ordering Procedures	4-3
Program Order Form	4-4
Program Components	4-6
Optional Program Material	4-7
Section 2: Distribution Procedures	4-9
Distribution Media	4-10
Program Material	4-11
Section 3: Hardware Engineering Change Levels	4-15
Section 4: Documentation Support	4-17
System Library Subscription Service	4-18
Publications Support	4-20
Additional Documentation Items	4-27

PART 1: FUNCTIONAL SUMMARY

Part 1 describes the functional items incorporated into this release; it has the following sections:

1. Release 21.8 Items
2. Planning for System Generation
3. Programming Considerations

SECTION 1: RELEASE 21.8 ITEMS

This section describes the new functional items
contained in this release.

Power Warning Feature (PWF) Support

The Power Warning Feature Support in this release is the currently available component release plus applicable APARs and PTFs.

The Power Warning Feature Support, along with its supporting hardware, prevents the loss of information in real storage during a utility power disturbance. The supporting hardware must include an Uninterruptable Power Supply to provide alternate power and equipment to signal the Power Warning Feature Support routines when a disturbance occurs.

The Power Warning Feature Support, after being signaled of a power disturbance and determining the significance of the disturbance, can transfer the contents of real storage to disk. After utility power is restored, the customer can use the Power Warning Feature Support restore routine to refresh the contents of real storage from disk.

Publication Support: For more information, please see the following publications:

OS Power Warning Feature (PWF) Support ICR Guide, GC28-6792.

OS System Generation, GC28-6554.

System Modification Program (SMP)

The System Modification Program (SMP) puts IBM and user modifications into the system libraries. It handles IBM modifications that are distributed as Program Temporary Fixes (PTFs) as well as user modifications, and can print records of the modifications it processes. SMP can also remove modifications that it has previously applied to the current operating system libraries if the DLIBs or permanent system libraries have not been changed. SMP has the necessary interface to use the assembler, the linkage editor, IEBUPDTE, IEBCOPY, and IMASBPZAP when needed.

SMP maintains a record of the current status of the operating system as well as a history of all modifications and changes to that system. The history records are time-stamped.

Publication Support: For more information, please see the following publications:

OS System Modification Program (SMP), GC28-6791

OS SMP Reference Summary, GX28-0684

Telecommunication Access Method Level 5E (TCAM 5E)

The TCAM Level 5E support in this release is the currently available TCAM component plus applicable APARs and PTFs.

TCAM 5E contains support for the IBM 3705 Communications Controller using the Network Control Program (NCP) or Emulator Program (EP). TCAM 5E includes:

- Local attachment of the 3705 in NCP mode: The physical link between the host CPU and a local 3705 in NCP mode is a standard System/370 I/O channel. This I/O channel may be a byte multiplexer, block multiplexer, or selector channel. The 3705 is represented by a single subchannel address. The host routines control the 3705 telecommunications network with a set of logical commands defined by the 3705 Network Control Program.
- Control of multiple 3705s in NCP mode and 270x's: TCAM 5E now controls multiple 3705s in NCP mode or emulation mode, 2701s, 2702s, 2703s and local control units with a single Message Control Program (MCP).
- Checkpoint/Restart: The TCAM 5E checkpoint/restart facility restores a 3705 system after an NCP failure. Checkpoint information and the mechanism for writing checkpoint records to disk differs from previous releases of TCAM. The 3705 does not checkpoint the total TCAM 5E environment. It checkpoints records that correspond to incident records in TCAM 5E and that reflect a partial change in the 3705 system.
- Online Test Facilities for the 3705 in NCP mode: The TCAM 5E Telecommunications Online Test Executive (TOTE) supports the 3705 online tests (OLTs). The 3705 OLTs test the 3705 subchannel, the 3705 itself, and devices attached to the 3705.
- Operator Control Facility: The TCAM 5E operator control facility allows a user to examine and alter the 3705 NCP telecommunications network. The method of formatting and entering operator control commands remains the same.
- Switch communication lines between 3705s: TCAM 5E permits switching communication lines from a 3705 in NCP mode to a backup 3705 without closing TCAM 5E. The backup 3705 is automatically IPLed.
- Switch 3705 between CPUs: TCAM 5E permits switching a 3705 in NCP mode from one CPU to a backup CPU. If TCAM 5E is running in the backup CPU, the 3705 is automatically IPLed.

Publications Support: For more information, please see the following publications:

Introduction to the IBM 3704 and 3705 Communications Controllers, GA27-3501.

OS System Generation, GC28-6554.

3803 and 3420 Magnetic Tape Subsystem Support

The IBM 3803 Model 2 and IBM 3420 Models 4, 6, and 8 Magnetic Tape Subsystem Support in this release is identical to the currently available component release. The programming support for these devices is now part of the operating system.

Publication Support: For more information, please see the following publications:

IBM 3803/3420 Customer Conversion Guide, GA32-0023.

OS System Generation, GC28-6554.

SECTION 2: PLANNING FOR SYSTEM GENERATION

This section describes considerations for generating the system in this release. For the complete information on generating your system, see IBM System/360 Operating System: System Generation, GC28-6554.

IPLing the Starter System

When using the Release 21.8 starter system for generating your system, do a cold start; that is, you must format the job queue.

SECTION 3: PROGRAMMING CONSIDERATIONS

This section describes considerations for programming under the operating system in this release.

TCAM (APAR 70325)

The FULLSCR macro has been incorporated to fix APAR 70325. The FULLSCR macro

- selectively prevents line and carriage counting on input at a 3270 Information Display System to prevent screen erasure and allow the use of formatted headings (Full Screen support).
- is optional in the INBUF subgroup of the TSO message handler. The FULLSCR macro should follow the CARRIAGE macro.
- may be coded more than once in the TSO MH and selectively executed by use of the PATH macro and path switching.
- should be used in conjunction with the Full Screen support provided by the FULLSCR= operand on the TPUT macro. (See the Guide to Writing a Terminal Monitor Program or Command Processor, GC28-6764.)

To use the FULLSCR macro, include a one-byte hexadecimal option field, IEDQFSCR, in the terminal table by coding IEDQFSCR OPTION XL1 in the terminal table. To initialize the field to 0, code the OPDATA= operand on the TERMINAL macro for each 3270 display terminal. This field should not be defined for any terminal type other than the 3270.

Note: The user is responsible for exiting from Full Screen mode before LOGOFF if he does not wish to be in this mode during the next LOGON.

Name	Operation	Operands
symbol	FULLSCR	$\left[\begin{array}{l} \text{TRIGGER} = \left\{ \begin{array}{l} \text{X}'00' \\ \text{X}'6D' \\ \text{X}'FF' \\ \text{X}'nn' \end{array} \right\} \\ , \text{LCOUNT} = \left\{ \begin{array}{l} 00 \\ nn \end{array} \right\} \\ , \text{CARRIER} = \left\{ \begin{array}{l} 00 \\ nn \end{array} \right\} \end{array} \right]$

symbol

Function: Name of the macro.

Default: None. Specification required if more than one FULLSCR macro is coded in the TSO/TCAM MCP.

Format: Must be from 1 to 7 characters.

TRIGGER = $\left\{ \begin{array}{l} \text{X}'00' \\ \text{X}'6D' \\ \text{X}'FF' \\ \text{X}'nn' \end{array} \right\}$

Function: Specifies the character that, if found in the attention ID (AID) byte of the message from a 3270 screen device, will switch the screen mode. If the user is already in Full Screen mode, the trigger character will switch the 3270 to regular screen control. If the user is not in Full Screen mode, he will be switched to this mode.

Default: X'6D' -- the CLEAR key.

Format: This operand must be one byte, in hexadecimal form.

Notes: X'00' causes an unconditional exit from Full Screen mode regardless of the data in the message. X'FF' causes an unconditional entry into Full Screen mode, regardless of the data in the message.

The user is responsible for controlling execution when using the unconditional forms of the FULLSCR macro. This can be done with path switching or user code in the MH.

LCOUNT = $\left\{ \begin{array}{l} 00 \\ nn \end{array} \right\}$

Function: Specifies the value to which the TSO line count will be set when Full Screen mode is entered.

Default: LCOUNT=00

Format: Must be specified in decimal form. The valid range is 00 to 24.

CARRIER = $\left\{ \begin{array}{l} 00 \\ nn \end{array} \right\}$

Function: Specifies the value to which the TSO carriage count will be set when the Full Screen mode is entered.

Default: CARRIER=00

Format: Must be specified in decimal form. The valid range is 00 to 80.

FULLSCR Macro Return Codes (Register 15)

- X'00' Trigger found; Full Screen mode switched.
- X'04' Trigger not found; Full Screen mode not switched.
- X'08' Option field not found; OPDATA= must be coded for each terminal at which Full Screen mode is desired in order to initialize the IEDQFSCR option field.
- X'0C' Not a TSO message; Full Screen mode not applicable.

Full Screen Support (Local and Remote)

TSO/TCAM Full Screen support allows the user to bypass normal screen line control in order to format the entire screen and then enter data within the format. The FULLSCR macro in the TSO Message Handler selectively prevents line and carriage counting on input while the associated TSO FULLSCR= operand on the TPUT macro performs the same function on output.

Telecommunication Access Method Level 5E (TCAM 5E)

When installing TCAM 5E under Release 21.8, you must do the following:

- Reassemble the MCP
- Reassemble the MPPs that were not reassembled under TCAM Level 4 and use the following macro instructions:

ICHNG	ICOPY	QCOPY	TCHNG	TCOPY
-------	-------	-------	-------	-------

BTAM

DCB READYQ Option (APAR 57064)

A READYQ option has been added to the BTAM DCB macro instruction. This option specifies the action BTAM takes when polling an IBM 3270 local display station on a read-initial operation, if a 3270 that was previously not ready (off) becomes ready (turned on). The READYQ option specifies whether BTAM or a user-written routine will handle this situation. If the READYQ option is not coded, the user will not be notified when a 3270 local display station is turned on. For additional information, see OS/360 Basic Telecommunications Access Methods, GC30-2004-7, as updated by TNLS GN27-1420 and GN27-1425.

Channel Retry (APAR 68718)

When a local 3270 CCC or ICC error occurs, BTAM attempts a retry. Previously, all channel errors except CDCs were posted as permanent errors.

New RFT Format (APAR 70023)

The four-byte address of the BSC3-3270 request-for-test has been changed. The format is MMDD where MM is the two-byte hexadecimal control unit selection address, and DD is the two-byte hexadecimal device address. For example, enter 61C1 as the hexadecimal address for EBCDIC control unit 1, device 1.

PART 2: MAINTENANCE ACTIVITY

Part 2 describes the system maintenance activity included in this release; it has two sections:

1. APAR Lists
2. Program Temporary Fixes (PTFs) Resolved

Some APARs and PTFs may have been resolved after this publication went to press. These additional APARs and PTFs are published in the Programming Systems Memos (PSMs). PSMs can be ordered through the System Library Subscription Service (SLSS) explained in Part 4 of this Release Guide.

SECTION 1: APAR LISTS

The following contains two lists of APARs:

- APARs fixed in this release.
- APARs fixed in previous releases but not identified in the Release Guides for those releases.

PART 3: MODULE SUMMARY

Part 3 has two sections:

1. Module Directory
2. Module Status

SECTION 1: MODULE DIRECTORY

This section lists all libraries in the operating system with their respective modules.

SECTION 2: MODULE STATUS

This section lists the modules that have been added to, altered, or deleted from the system for this release.

The listing is arranged by library. Each field contains:

	MODULE NAME	The module or alias name for each member that has been changed.
*	NEW	An asterisk indicates a new module for this release.
	MOD SIZE	The storage size in hexadecimal required for the module.
+or-	MOD SIZE CHG.	The amount of change (in hexadecimal) from the previous release -- + for increase, - for decrease.
A	ALS	An "A" indicates an alias name.
	OLD SSI	SSI (System Status Index) for the previous release.
	NEW SSI	The SSI for this release.
	ALIAS TRUE NAME	The true module name for this alias. (This field appears only if the module is reentrant and reusable.)

PROGRAM ORDER FORM

The announcement package contains a program order form for IBM System/360 Operating System. This form should be used to order this release from the Program Information Department (PID) after IBM Branch Office approval has been obtained. It is not necessary to reorder to continue receiving OS/360 announcement material.

To complete the order form, refer to the sample order form and perform the steps described in the following paragraphs. Please forward volumes with your order form.

Program Order

You must complete this section.

Column 14: R Reorder total replacement.
 D Delete the entire OS system from my profile.

<u>Columns</u> <u>15-20</u>		<u>21-22</u>	<u>23-24</u>
<u>Device</u>	<u>Distribution</u> <u>Media Code</u>	<u>Type</u>	<u>Volumes</u> <u>Required</u>
2311	26	For MT 7DC/800	03
	28	For MT 9/800	03
	29	For MT 9/1600	02
	52	For 1316	06
2314 ^① or	26	For MT 7DC/800	03
3330 ^①	28	For MT 9/800	02
	29	For MT 9/1600	02 ^②

For an explanation of the magnetic tape(MT) codes see the back of the order form.

^① The 2314 and 3330 resident systems are not distributed on disk.

^② 3330 users need send only one magnetic tape.

Identification

Preprinted.

User Volume Information

Indicate as required.

User Registration

To register a new user or to modify a previous user registration, use one of the following codes:

M Modify registration.

D Delete the entire registration from the PID files.

S Change "Ship to:" for this order only.

For IBM Use

Must be completed by the IBM Branch Office.

PROGRAM COMPONENTS

After ordering this release you will receive the following components:

Program Number Program Component Name

360S-AL-531	ALGOL
360S-AS-037 *	Assembler F
360S-CB-545	ANS COBOL
360S-CI-505 *	MFT Control Program

360S-RG-038	Report Program Generator
360S-SM-023	Sort/Merge
360S-UT-506 *	Utilities
360S-UT-507 *	Independent Utilities

* Changed with this release.

OPTIONAL PROGRAM MATERIAL

The symbolic library is the optional program material. It is available from the Program Information Department (PID) on the following distribution media:

- 9-track magnetic tape (800 or 1600 bpi).
- 7-track magnetic tape (800 bpi) with the Data Conversion feature.

Assemblies done using OS/360 symbolics must have SYS1.MODGEN concatenated to SYS1.MACLIB and SYS1.PVTMACS. SYS1.MODGEN contains Stage II system generation macro instructions, some of which are called by other modules in the system. Whether or not you specify TSO in your system, you must concatenate SYS1.TSOMAC to SYS1.MACLIB, SYS1.MODGEN, and SYS1.PVTMACS. SYS1.TSOMAC contains some macro instructions needed to assemble OS/360 symbolics.

Assembling source code may cause object code that is not the same, byte for byte, as the object code in the distribution libraries. This is due to differences in macro expansions and does not affect the function of the modules.

Note: The sequence number of the desired file must be placed in the LABEL parameter.

The SYSUT2 data set must be a partitioned data set (PDS). The space allocated to the PDS must be calculated using the tables provided in the documentation that accompanies the symbolic libraries, with consideration for the desired blocking factor. When creating a 1316 PDS for many large files on one disk, use 3360 as the blocking factor.

* Changed with this release.

SECTION 2: DISTRIBUTION PROCEDURES

This section describes the distribution procedures for this release of the operating system and lists the basic program material. It identifies the components and their resident locations.

DISTRIBUTION MEDIA

The complete set of OS/360 distribution libraries (DLIBs) is distributed on 1316 disk packs or magnetic tapes.

For 2311 system residence, send one set of the following:

1. Six 1316 disk packs
2. Two magnetic tapes for 9-track 1600 bpi
3. Three magnetic tapes for 9-track 800 bpi
4. Three magnetic tapes for 7-track 800 cpi

All items 2, 3, and 4 are restorable to five or six 1316 disk packs.

2314 system residence is only distributed on magnetic tape. For 2314, send one set of the following:

5. Two magnetic tapes for 9-track 1600 bpi
6. Two magnetic tapes for 9-track 800 bpi
7. Three magnetic tapes for 7-track 800 cpi

All items 5, 6, and 7 are restorable to two 2316 disk packs.

3330 system residence is only distributed on magnetic tape. For 3330, send one set of the following:

8. One magnetic tape for 9-track 1600 bpi
9. Two magnetic tapes for 9-track 800 bpi
10. Three magnetic tapes for 7-track 800 cpi

All items 8, 9, and 10 are restorable to one 3336 disk pack.

The control cards for restoring disk packs from magnetic tapes are described in IBM System/360 Operating System: System Generation, GC28-6554.

The organization of the data may be determined by printing the volume table of contents (VTOC) for each disk pack.

PROGRAM MATERIAL LISTS

The basic program material list identifies the components of Operating system/360 and their residence when ordered.

PROGRAM MATERIAL LIST FOR OPERATING SYSTEM/360 RELEASE 21.8

BT20-03	7-track (800 cpi) contains DLIB01 part 3	3 files

DASDI and DUMP/RESTORE precede the dumped disk pack data on a restore tape. All 7-track tapes require the data conversion feature.

See OS System Generation, GC28-6554, for restore procedures.

^① The modules for the 3735 Macro/Utility (CQ563) are contained in CQ513.

^② DLIB01 requires three tapes for 7-track users and two tapes for 9-track users.

SECTION 3: HARDWARE ENGINEERING CHANGE LEVELS

This section defines the minimum engineering change (EC) levels known to be required for the generation of this release. There are no changes from Release 21.7 to Release 21.8.

Model 155II

EC 263031
EC 261766

Model 158

EC 262936 plus REAs 02-045-041 through 02-045-049
EC 262951 plus REA 02-57-118

Model 168

EC 717705
Microcode EC 718712

3830 Model 2 Control Unit

EC 427556

3275 Display Station

EC 718549

3411 Magnetic Tape Control Unit

EC 733733

SECTION 4: DOCUMENTATION SUPPORT

This section lists the publications that support the operating system in this release. You can order these publications through the IBM System Library Subscription Service (SLSS). This section contains:

Instructions for ordering these publications.

System Reference Library (SRL) publications.

Program Logic Manuals (PLMs).

Technical Newsletters (TNLs) that amend the base publications.

SYSTEM LIBRARY SUBSCRIPTION SERVICE

Use the System Library Subscription Service (SLSS) form to order the publications described in this section. On the front of the form, enter your name, address, and any changes to your profile; on the back, list the publications you want.

PUBLICATIONS SUPPORT

The SRL and PLM publications are grouped within the following subject codes:

20	Programming System -- General
21	Symbolic Assembly Systems
24	COBOL
25	FORTRAN
26	ALGOL
28	RPG
29	PL/I
30	Access Methods, Data Management, I/O Control Programs
31	System Service Program
32	Utility Program
33	Sort/Merge
34	System Planning, Generation, Installation, SMF
36	Control Program
37	RAS
38	Remote Job Entry
39	Time Sharing
40	System Operation

Each entry can include the following:

<u>Title</u>	The name of the publication.
<u>Order No.</u>	The order number for the publication.
<u>TNL No.</u>	Any applicable Technical Newsletters associated with the base order number.

Release Guides for previous Release 21.x releases are still available. When ordering, please use the special order number:

<u>Special Order Number</u>	<u>Title and Original Order Number</u>
GT00-0071	Release 21.0 Guide (GC28-6730-3)
GT00-0122	Release 21.6 Guide (GC28-6730-4)

ADDITIONAL DOCUMENTATION ITEMS

Many types of documentation can be ordered through SLSS by using the form shown at the beginning of this section. In addition to the SRLs and PLMs listed in this section, documentation can be ordered for:

Hardware

Programming Systems

Type III Programs with Service Class A

Program Products

Field-Developed Programs

Programming RPQs

Installation Supplies

Education

Programming Systems Memos (PSMs)

Early Warning System (EWS) Microfiche

Engineering Change Announcements (ECA),
Service Aids (SA)

Program Temporary Fix (PTF) Listings

Program Listings

For a detailed list of available items, see the IBM System/360 and System/370 Bibliography, GA22-6822 with TNL GN20-0370.

Your views about this publication may help improve its usefulness; this form will be sent to the author's department for appropriate action. Using this form to request system assistance or additional publications will delay response, however. For more direct handling of such requests, please contact your IBM representative or the IBM Branch Office serving your locality.

Possible topics for comment are:

Clarity Accuracy Completeness Organization Index Figures Examples Legibility

Cut or Fold Along Line

What is your occupation? _____

Number of latest Technical Newsletter (if any) concerning this publication: _____

Please indicate your address in the space below if you wish a reply.

Thank you for your cooperation. No postage stamp necessary if mailed in the U.S.A.
(Elsewhere, an IBM office or representative will be happy to forward your comments.)

Your comments, please . . .

This manual is part of a library that serves as a reference source for system analysts, programmers, and operators of IBM systems. Your comments on the other side of this form will be carefully reviewed by the persons responsible for writing and publishing this material. All comments and suggestions become the property of IBM.
