NWB-1102

OS

SONY NEWS-OS Release 4.2.1aRD

This is NEWS, SONY's domestic workstation.

Even in the same pattern "NWS-5000X", there are three CPUs of 200/176/150MHz. BTO model (Select and purchase parts when ordering), so there is no way to tell.

[ROM monitor](#)

About ROM variables. Write.

[Monita command](#)

Still write.

[Dip switch, security switch](#)

Dip switch and security switch settings on the front of the body.

[APbus and support device](#)

Details of the rear bus.

[Customization](#)

System customization with ROM variables.

How to install NEWS-OS

I don't need it...

(For now)

- ROM Monita's manual is common with NWS-5000/5900/7900, so the specifications of the ROM command are also common.
- To boot from CD-ROM, type bo scsi (,60) on the ROM monitor.
- The built-in SCSI CD-ROM drive is bus 0 ID number 6.
- Press [POWER ON] for 2-3 seconds to turn on.
- ROM Monita help is [he].
- The HDD format is a set of NEWS-OS CD-ROMs, bo scsi(,60) format -f. However, the progress situation was not displayed for some reason, and it took a very long time (2GB for about 2 hours).
