

Product Authorization Key (PAK) Information for OpenVMS AXP Layered Products

AV-PV1BP-TE

March 1994

A License Management Facility (LMF) Product Authorization Key (PAK) allows you to access a software product, and its documentation in Bookreader™ format. A PAK must be registered and loaded before you can activate the associated product from the Digital CD-ROM Software Library for OpenVMS™ AXP™ Layered Products. Each product has a unique LMF PAK name.

PAKs documented in Table 2 allow access to OpenVMS AXP Layered Products.

See product installation guides for detailed instructions on registering and loading product license PAKs.

For complete instructions on using the OpenVMS License Management Facility (LMF), see the *OpenVMS License Management Utility Manual*.

These PAKs are offered in confidence, subject to the terms and conditions of your Digital CD-ROM Software Library for OpenVMS AXP Layered Products license agreement(s). These PAKs have been made available to you for your internal use only.

Steps to License Registration

To license and use software products on the OpenVMS operating system, follow these steps:

1. Find the PAK for your product in Table 2, which lists products in alphabetical order.
2. Register information from the PAK in the LICENSE database. Log into the system manager's account, SYSTEM.

You can respond to the license registration prompts of VMSLICENSE.COM or enter the LICENSE REGISTER command directly. The information you enter becomes data in the LICENSE database.

3. Ensure that the system activates the registered license.

LMF requires that a registered license be activated before you can use the licensed product. When you register a license with VMSLICENSE.COM, you can confirm an option to activate the database information automatically. If you register a license with the LICENSE REGISTER command, you must also activate it with a LICENSE LOAD command.

4. Install the product corresponding to the license.

Activating a License in the LICENSE Database

To allow access to a licensed product, activate each registered license. License activation involves transferring or loading data from the on-disk LICENSE database into system memory. Table 1 shows the three methods of license activation for LMF.

Table 1: Activating A License

Status of a Registered License	Activation Method
Registered with VMSLICENSE.COM	You confirm the load option.
Registered with the LICENSE REGISTER command	You use the LICENSE LOAD command.
Previously registered system starting up	System activates the license automatically.

Read Before Installing OpenVMS AXP March 94 Field Test Layered Products

AV-PYTFE-RE

March 1994

You have just received the Digital CD-ROM Software Library for OpenVMS™ AXP™ Layered Products media and documentation.

Contents of the Kit

Your kit contains the following items:

- **Part Listing**

Please read the Part Listing enclosed in the kit, and check to see that all items listed are actually in your kit. If your kit is damaged or any items are missing, call your Digital representative.

- **Software Binaries Compact Discs**

The kit includes the following Software Binaries discs:

Name	Volume Label	Disc Number
Software Binaries Mar 94	AXPFTBMAR941	Disc 1 of 4
Software Binaries Mar 94	AXPFTBMAR942	Disc 2 of 4
Software Binaries Mar 94	AXPFTBMAR943	Disc 3 of 4
Software Binaries Mar 94	AXPFTBMAR944	Disc 4 of 4

See the *OpenVMS AXP Mar 94 Field Test Layered Products Compact Disc User's Guide* for the locations of product directories.

Documentation for each layered product is located in a [product_directory.DOCUMENTATION] subdirectory. This includes both PostScript® (.PS) and text (.TXT) product documentation. This subdirectory replaces the former [product_directory.LINE_DOCS] and [product_directory.POST_DOCS] subdirectories. Product documentation on a Software Binaries disc includes the following types of information:

- Cover letter { product_directory_COVER.PS
product_directory_COVER.TXT }
- Installation guide { product_directory_IGUIDE.PS
product_directory_IGUIDE.TXT }

See the *OpenVMS AXP Mar 94 Field Test Layered Products Compact Disc User's Guide* for the locations of product documentation subdirectories. The person who installs this software should explain to users how to access the documentation.

- **Online Documentation Compact Disc**

This kit includes the following Online Documentation disc:

Name	Volume Label	Disc Number
Online Documentation Mar 94	AXPFTDMAR941	Disc 1 of 1

This disc includes Bookreader™ formatted online documentation in the [DECW\$BOOK] directory. See the *OpenVMS AXP Mar 94 Field Test Layered Products Compact Disc User's Guide* for instructions about accessing and reading Bookreader documentation.

To read online documentation, you must have the following environment:

- OpenVMS AXP Version 1.5 or higher operating system.
- DECwindows™ Motif® Version 1.1 (or higher) for OpenVMS AXP software. Bookreader software is packaged with the DECwindows Motif layered product.
- A bitmap DECwindows display (a workstation, or a personal computer using PATHWORKS™ software).
- A compact disc reader. Alpha AXP™ hardware systems are shipped with a compact disc reader.

- **Read Before Installing Cover Letter**

This letter, which lists the materials shipped to you.

- ***OpenVMS AXP Mar 94 Field Test Layered Products Compact Disc User's Guide***

This guide lists the contents of the Digital CD-ROM Software Library for OpenVMS AXP Layered Products, gives locations of software product save sets and supporting documentation, and provides guidelines for handling compact discs.

License Management Facility (LMF) Information

A License Management Facility (LMF) Product Authorization Key (PAK) allows you to access a software product and its documentation in Bookreader format. A PAK must be registered and loaded before you can install the associated product from the Software Binaries disc. Each product has a unique LMF PAK name.

Selecting DECwindows Motif for OpenVMS AXP Device Support

DECwindows Motif device support ships with the OpenVMS AXP operating system. When you install the operating system, the installation procedure automatically installs one save set with the required DECwindows files.

- If you are installing the OpenVMS AXP operating system on a DEC 3000 AXP series workstation, you must also install the optional save set that is needed by the DECwindows Motif for OpenVMS AXP product, and that is included on the OpenVMS AXP media kit.
- If you are installing the OpenVMS AXP operating system on an Alpha AXP system that does not have a graphics monitor, you do not need to install this optional save set.

Note the following about the required and optional DECwindows save sets:

- The required DECwindows save set included with the operating system supplies the base support you need to run the DECwindows Motif for OpenVMS AXP layered product.
- The optional DECwindows workstation support save set that you can choose during the OpenVMS AXP installation is required if you want to run the windowing software on a DEC 3000 AXP series workstation (provided you also install the separate DECwindows Motif for OpenVMS AXP layered product).
- The required DECwindows save set plus the optional DECwindows workstation support save set offered with the OpenVMS AXP operating system does not constitute complete DECwindows support. You must install the separate DECwindows Motif for OpenVMS AXP layered product and license to obtain complete support.

Benchmarking Policy on AXP Systems

A benchmarking policy statement is provided on the OpenVMS AXP Layered Products Software Binaries CD-ROM in the [README] directory.

Sending Back Your Comments

Digital appreciates your comments. If you find errors in a manual, or want to make comments about a manual, there are several ways to provide comments:

- Copy the reader's comments template (COMMENTS.TXT) from the [README] directory on the OpenVMS AXP Layered Products Software Binaries disc to your account. Edit the file and send it through internet mail to the following address:

alpha_docs@bookie.enet.dec.com

- Use the Reader's Comments form attached to the *OpenVMS AXP Mar 94 Field Test Layered Products Compact Disc User's Guide*. This manual contains a preaddressed, postage-paid Reader's Comments form at the back.
- Use the Reader's Comments form attached to printed product documentation manuals. Each manual contains preaddressed, postage-paid Reader's Comments forms at the back.
